# ProteqFlu Vaccine

## APPENDIX 1 – VACCINE PACKAGING

Image 1: Boxing

Image 2: Showing 10 x blister packs per box

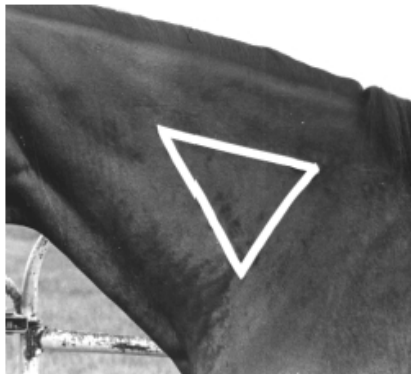

Image 3: Blister Pack containing 10 vials

# Vaccine Details

- ProteqFlu TE from Merial
- Canary pox with EI gene inserted (GMO)
- Allowed to be used in Australia under strict permit conditions
- Serology to distinguish vaccinated versus infected
- IM injection in neck muscle
- Horses must be microchipped for permanent ID.  
(Requirement of OGTR & APVMA permits)

# Administering Vaccine

- shake the vaccine gently before use
- use immediately after opening vial
- administer by intra-muscular injection (*recommended directly transcutaneously into the muscle*), preferably in the neck region
- record AHA bar codes
