**ABOUT THIS PUBLICATION**

This publication contains information on the control of insect and mite pests in azuki bean, canola, chickpea, cowpea, faba bean, field pea, linseed, lucerne, lupin, maize, mungbean, navy bean, peanut, pigeon pea, safflower, sorghum, soybean, sunflower and winter cereal crops. Advice concerning the significance and control of the more common pests, or potential pests, of these crops is presented. Insecticides and miticides are collectively described as pesticides in this publication.

Information on toxicity of pesticides to humans, bees, fish and birds, and herbicide/pesticide compatibilities is also presented. There is also a guide to retail product prices.

The prudent use of pesticides is an important part of integrated pest management. Pesticide selection must be based on a sound knowledge of the pest and the situation in which it must be controlled.

**DISCLAIMER**

This document has been prepared by the authors for NSW Department of Primary Industries for and on behalf of the State of New South Wales, in good faith on the basis of available information.

While the information contained in the document has been formulated with all due care, the users of the document must obtain their own advice and conduct their own investigations and assessments of any proposals they are considering, in the light of their own individual circumstances.

The document is made available on the understanding that the State of New South Wales, the author and the publisher, their respective servants and agents accept no responsibility for any person, acting on, or relying on, or upon any opinion, advice, representation, statement or information whether expressed or implied in the document, and disclaim all liability for any loss, damage, cost or expense incurred or arising by reason of any person using or relying on the information contained in the document or by reason of any error, omission, defect or mis-statement (whether such error, omission or mis-statement is caused by or arises from negligence, lack of care or otherwise).

Whilst the information is considered true and correct as at April 2009, changes in circumstances after the time of publication may impact on the accuracy of the information. The information may change without notice and the State of New South Wales, the author and the publisher and their respective servants and agents are not in any way liable for the accuracy of any information contained in this document.

Recognising that some of the information is provided by third parties, the State of New South Wales, the author and the publisher take no responsibility for the accuracy, currency, reliability and correctness of any information included in the document provided by third parties.
