Introduction

The NSW dairy industry requires a significant degree of engineering support to enable it to function effectively and profitably while meeting a range of legislative requirements. The contact details and services offered by engineering firms are not always apparent to the dairy farm businesses of NSW.

This booklet is a compilation of engineering firms who responded to a request by Industry & Investment NSW for tenders to provide an on farm service to dairy farmers in the Hunter Valley and South Coast dairying districts of NSW. The service required an auditing of farm energy and water use on the identified farms with “focus on the milk harvesting process”. Twelve tenders were received and all have provided permission to be included in this booklet.

I trust that these contact details will be useful and provide an opportunity for dairy farmers to consider the services offered by a range of engineering firms in NSW.

Tim Burfitt
Manager
Intensive Livestock Industry Development

SEMF Pty Ltd

www.semf.com.au

Main Area of Business

SEMF is a multi-disciplinary engineering, scientific and management company that provides consultancy and management skills for all facets of construction projects. We provide complete sustainable solutions – from initial planning, design, construction and facilities management by ensuring that we plan and act for the long term good of our customers, our partners and our community. Our Area of expertise is in electrical engineering disciplinary.

SEMF's engineering consulting and design services are categorised as:

- Building Engineering
- Industrial Engineering
- Automation and Control
- Information Technology Engineering
- Bulk Materials Handling
- Process and Manufacturing Engineering
- Environmental & Infrastructure Solutions
- Risk Engineering and OH&S
- Facilities Management
- Planning
- Infrastructure Engineering
