

NSW Explorers Directory 2008

The **2008 Mineral Explorers Directory** showcases mineral exploration in New South Wales, Australia with an emphasis on the junior and mid-tier companies. Information includes:

- Detailed information on over 50 junior and mid-tier exploration companies active in NSW - many seeking partners.
- A geological overview of NSW
- The geology, mineral occurrences and geophysics of NSW as Google Earth KMZ files and ESRI Shapefiles and ArcReader PMF format.
- Information on the current hot prospects, prospective ground, active mines and developments in NSW.
- Detailed information for prospective explorers including a complete catalogue of the map-related geoscience material published by the Geological Survey of NSW. Also included are web links to hard copy publications and online services.
