KEY

HEIGHT: Is an average in metres at maturity. Height is variable and affected by many factors.

DROUGHT: H = High resistance to drought M = Moderate resistance to drought L = Low drought resistance

FROST: H = suitable for high frost areas M = suitable for medium frost areas L = suitable for light frost areas

SOIL TYPE*: H = Heavy M = Medium L = Light, well drained

*The above letters indicate the soil types that each species will tolerate; however consideration must also be given to the drainage eg. poor drainage/good drainage / water logged etc.

SALT: Y = suitable for saline soil conditions or seaside areas.

FLOWER COLOUR: is a guide only

This information outlined in this catalogue is meant as a guideline only. Further information can be obtained from various reference books.

AVAILABILITY OF SPECIES WILL VARY THROUGHOUT THE YEAR
