To publish or not to publish: I confirm that my completed questionnaire does not contain sensitive information and can be published in full on the Department of Primary Industries website.
Select your interests:
Other interests:
How effective do you think the RFAs have been Not effective
:
What elements would you want to see retained and remain unchanged : NONE
What elements would you want to change?: I do not want the RFAs extended. I strongly oppose the existence of these RFAs and want our native forests left to preserve a home for our native animals and a beautiful place for Australian to enjoy. In addition, I value the ability of these forests to help store carbon, minimise the greenhouse effect, and conserve the soil. We should be using plantation timber for woodchips and other needs.
Simplifying the RFAs and removing redundant or duplicated commitments?:
Maintaining a strong focus on triple bottom line outcomes?:
Updating references to legislation, codes of practice or new regulation? :
Alignment with contemporary policies and programs?:
Alignment with the National Forest Policy Statement and global agreements on sustainable forestry?:
Improving review and reporting requirements:
What improvements could be made to the five yearly review and consultation processes?: Broader advertising to inform the public about RFAs and what effect they have on our native forests. Also an honest cost benefit analysis of forest operations in NSW. This form does not give a clear option for people opposed to the RFAs to object but assumes these agreements are staying and only asks how they can be modified,. This is a very manipulative approach and not real community consultation.
What improvements could be made to support the day-to-day implementation of RFAs?:
What further research

and monitoring could be important to consider for future RFAs?:

What improvements could be made to RFA related communication?:

What improvements could be made to the RFA implementation framework to support a rolling extension mechanism?:

What other improvements could be made to the RFA framework?: They should be scrapped and our native forests protected.
