Using 130 years of research and development know-how to increase productivity and resilience across NSW agriculture sectors

Learn how our research and development is building stronger primary industries by signing up to our newsletter

The **Enhanced Drought Information System** provides farmers with world-leading weather and climate data to make better business decisions

**Paddock to Planning** continues the conversation with and between councils about agricultural land use planning

Understanding the role of **biochar** in lifting the soil organic carbon ceiling of soil organic carbon in subtropical and tropical grasses

**Farms of the Future** facilitates tech-enabled production and monitoring through improved connectivity and new technologies

**Tocal College** provides specialised training to rural industries – a leader in Australia

Working with industries to understand and support **agricultural labour needs**

**Supporting and preparing our stakeholders** to make our industry and communities stronger when natural disasters, drought and biosecurity outbreaks occur

Delivering \$6 for every \$1 invested in capacity and capability research as part of the **Grains Agronomy and Pathology Partnership**

Working alongside industry to implement mandatory **sheep and goat electronic identification** across the State

**Clover4Bees** examines how to utilise pasture legumes for the potential for honey production

**Southern Multi Breed** will improve beef cattle genetic information to increase producer and breeder profits
