

Basin Plan Environmental Outcomes Monitoring for Fish (2014/15 – 2019/20): Water Resource Planning Area Reports

Hayden Schilling & David Crook

9 June 2023

Table of Contents

Chapter 1: Introduction and Preface.....	3
Chapter 2: Barwon-Darling Watercourse Water Resource Planning Area.....	4
Chapter 3: Gwydir Water Resource Planning Area	52
Chapter 4: Intersecting Streams Water Resource Planning Area	105
Chapter 5: Lachlan Water Resource Planning Area.....	146
Chapter 6: Macquarie-Castlereagh Water Resource Planning Area	200
Chapter 7: Murrumbidgee Water Resource Planning Area	254
Chapter 8: Namoi Water Resource Planning Area.....	310
Chapter 9: New South Wales Border Rivers Water Resource Planning Area	362
Chapter 10: New South Wales Lower Darling Water Resource Planning Area	417
Chapter 11: New South Wales Murray Water Resource Planning Area.....	463

Acknowledgement

This project is funded by the Commonwealth Government under the *Federation Funding Agreement – Environment on Implementing Water Reform in the Murray-Darling Basin*. The dataset used in the temporal analysis was generated by NSW DPI Fisheries from 1994–2022 and sourced from multiple internally and externally funded projects. The authors acknowledge past and present DPI Fisheries scientists (especially Dr Dean Gilligan), technicians and managers that contributed to its collection as well as the ongoing support of external collaborators and funding agencies (in particular, the Murray–Darling Basin Authority, the Commonwealth Environmental Water Office, and the NSW Freshwater Recreational Fishing Trust). We continue to be thankful for the ongoing site access granted by private landowners across NSW and acknowledge that we work on Country which always was and always will be Aboriginal land. The fish surveys that generated the data used in our analyses were conducted under permits approved by the NSW Fisheries Animal Care and Ethics Committee.

Chapter 1 Introduction and Preface

This report spans the first series of the Basin Plan Environmental Outcome Monitoring – Fish (BPEOM-F) program, starting in 2014/15 as a pilot and running annually until 2019/2020. Each chapter of this reports on a different New South Wales (NSW) Water Resource Planning Area (WRPA; [Figure 1.1](#)). The New South Wales Lower Darling and Murray WRPA was split into two regions for more spatially explicit reporting.

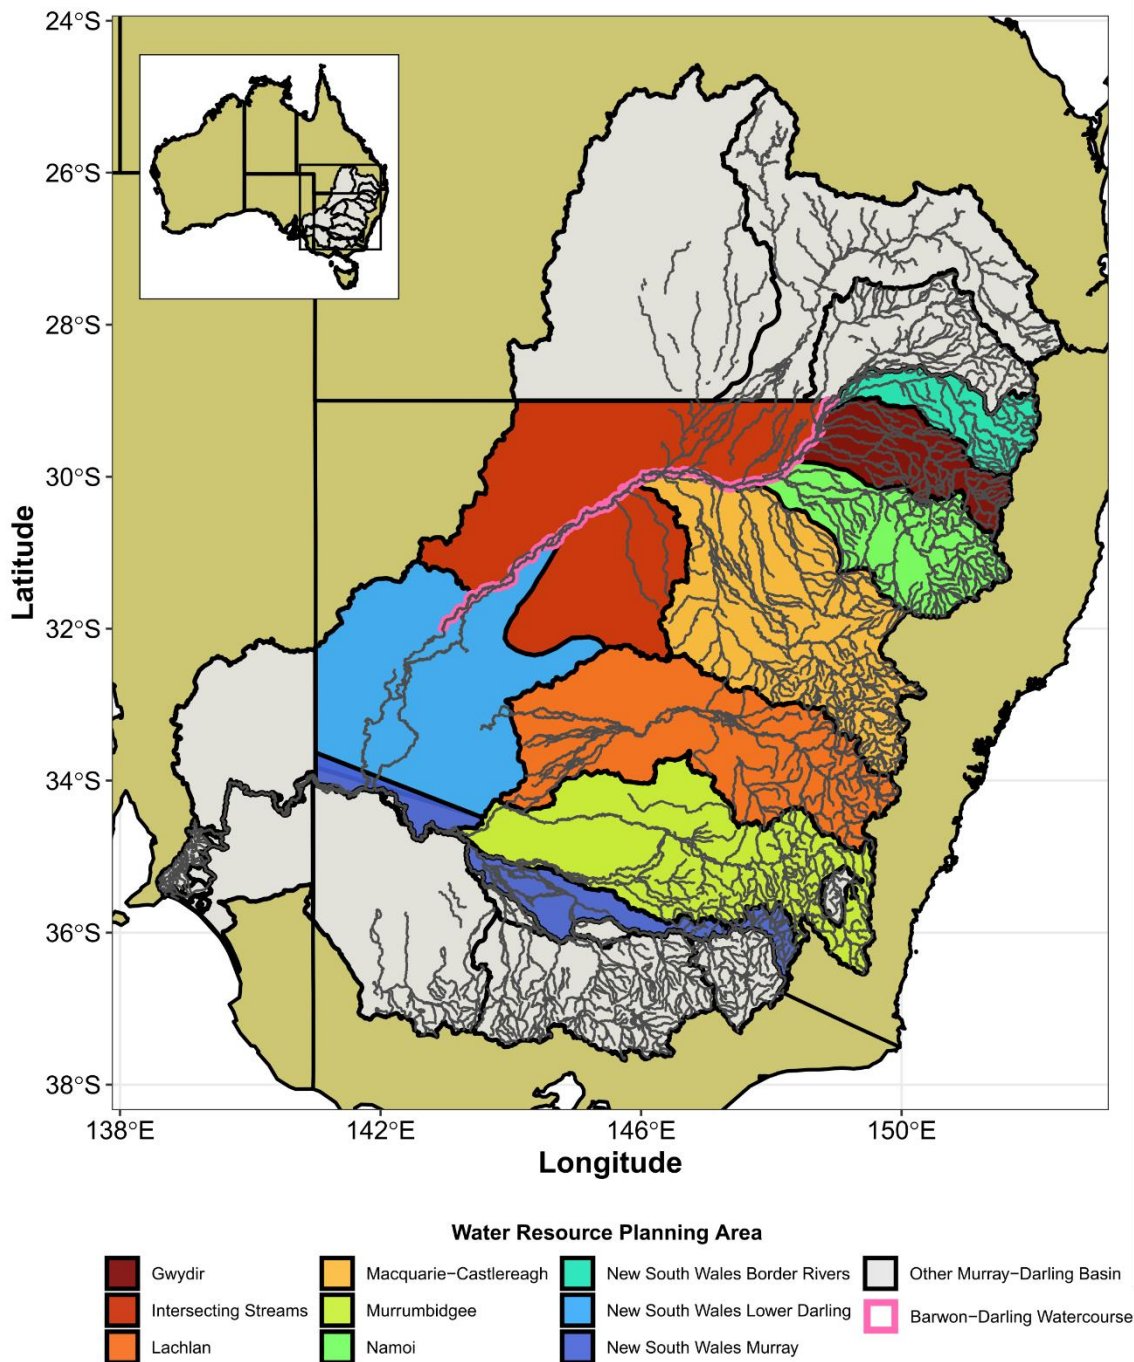

Figure 1.1 Map showing the Water Resource Planning Areas (WRPAs) contained within this report. Other WRPAs not located in NSW are not reported in this document. Note the New South Wales Murray and Lower Darling WRPA has been split into two separate areas for reporting.

Each chapter (Chapters 2 – 11) is designed as a stand-alone report with the ability to be viewed in isolation and as such there is a large amount of repetition between chapters. Each chapter is also formatted identically to aid readers in locating information.
