Introduction

Marine Parks help conserve our state's marine life for present and future generations, whilst providing a great opportunity to improve public appreciation, understanding and enjoyment of our unique marine environment.

The Jervis Bay Marine Park covers an area of approximately 23,800 hectares, including the semi-enclosed waters of Jervis Bay and over 160 kilometres of coastline and adjacent estuaries, extending from the north to Sussex Inlet in the south. The total waters of Currarong Creek, Moona Moona Creek, Currarong, Woolly Gully, Callala Creek and Corranging Creek are also within the Marine Park. The waters of the Marine Park are influenced by the warm southern flowing East Australian Current, and temperature currents flowing north and periodic flows of cold water from the Tasman Sea.

The dramatic range of offshore formations provide a framework for a wide variety of species, including deep-sea corals, exposed and shallowed sandy beaches, rock platforms, rocky reefs, sandy bottoms, bays, helped forests, seagrass meadows and mangroves. Popular recreational activities undertaken within the Marine Park include fishing, scuba diving, dolphins and whale watching, boating, surfing and snorkelling.

Penultimate Apply

The Jervis Bay Marine Park has been established to help conserve our marine environment for the enjoyment of present and future generations. Please be aware that on

...the Myola sand spit at the southern end of Callala Bay, the Currambene Creek mudflats sanctuary zone and the ‘designated anchoring areas’ of the Marine Parks. The ‘designated anchoring areas’ of the Marine Parks are to be used as moorings and it is an offence to misused, please contact the Jervis Bay Marine Park office.

Zoning

The introduction of a marine park zoning plan is based on the idea of a marine biodiversity, while allowing for the provision of recreational and commercial activities. Use of the Marine Park is regulated through a zoning plan providing a range of protection levels. For G20 co-inhabitats of zone boundaries, users are advised to satisfy themselves of the accuracy of the information contained in this publication and agents expressly disclaim liability for any act done, or omission made, based on the information contained in this publication.
