Throwing a line in at a new spot always makes for a great fishing adventure, whether it's on a family holiday or just somewhere new close to home. No matter your fishing expertise, NSW boasts a wide range of fish species and great places to catch them, including in our many inland rivers, impoundments and streams to the productive estuaries, lakes, beaches and rocky headlands on the NSW coast. There are also many inshore and offshore fishing opportunities from your boat or if using one of the many experienced charter fishing services available

There are many reasons to go fishing, including to unwind and relax, spend time with family and friends, enjoy nature and of course to catch a tasty meal of fresh fish. Over a million people in NSW enjoy this fantastic lifestyle and the great news is that you are never too old or young to take up fishing so get out there and give it a go! Getting into fishing is easy. If you don't know where to start, just head into your local tackle store where the friendly staff can provide tips on tackle, bait and techniques plus point you to a safe, convenient spot to throw a line in

NSW DPI has developed these *Go Fishing* guides as a snapshot of popular NSW fishing locations in both fresh and saltwater to help improve your recreational fishing experiences. For more information on other locations, fish species, size and bag limits and permitted gear not listed in these guides, visit the NSW DPI website or download the **FishSmart App** from the App store on your Android or iPhone.

Overview

Sydney Harbour

Sydney Harbour is best known for it premier tourist attractions like the Opera House, Luna Park, Taronga Zo and of course the iconic Harbour Bridge. However it is also highly regarded in recreational fishing circles as an outstanding shorebased fishing destination offering a variety of productive options including rock platforms, wharves, piers and numerous parks and reserves.

Popular with serious anglers, family fishos and visiting tourists, the Harbour offers quality fishing for a range of common species such as dusky flathead, mulloway, bream, luderick, mullet, tarwhine, silver trevally, a couple of different squid species and leatherjacket. In the warmer months, the Harbour is invaded by pelagic species including Australian salmon, bonito, frigate mackerel and the mighty kingfish, providing keen sportfishermen with exciting action from the many wharves, piers, reserves and rocky outcrops.

Fishing access in the Harbour is generally pretty good. More than 120 known land-based locations, some in sight of the city's most iconic landmarks, provide for truly unique fishing experiences. Take the opportunity to explore the array of land-based fishing options available around the Harbour.

Before you plan a trip to Sydney Harbour, make sure you do your homework as a number of fishing closures are in place. These closures exist for a variety of reasons, from public health and safety to preserving unique aquatic environments. The majority of these closures are signposted. Penalties apply for not complying with the relevant rules and regulations.

Sydney Harbour and all its tributaries is listed as an Intertidal Protected Area, which means take of any shellfish, molluscs and crustaceans (for example crabs, cunjevoi, cockles, mussels, snails, whelks, oysters and abalone) is prohibited

As anyone who has ever spent time on its foreshores or out on the water will know, Sydney Harbour is an extremely busy working port with huge amounts of boat traffic, industry, tourism and recreational/commercial use. The key to enjoying this shared resource is for recreational fishers to fish responsibly and make sure we present a positive image by cleaning up any fishing related mess (even if it's not yours!), keeping the noise down (especially at night) and to show respect and courtesy to other users such as commuters, residents and workers

Following these common sense suggestions will help ensure we all enjoy continued access to the Harbour's fantastic land-based fishing locations, now and into the long-term.

This guide to *Sydney Harbour's Wharves, Piers & Parks* is the first of a planned three-part series of Sydney based DPI *Go Fishing* handbooks.

Council, leased and private land is subject to its own regulations and management and it is advisable to always check if fishing is permissible at that location.

FISH RESPONSIBLY!

- Leave no litter
- Minimise noise (especially at night)
- Be respectful
- Promote safe and responsible fishing

While most anglers fishing the wharves do so responsibly, a minority continue to do the wrong thing. It is vital all fishers do the right thing as these wharves are simply too good to lose!

If you enjoy fishing from Sydney's ferry wharves, make sure you:

Be considerate of nearby residents and keep the noise to a minimum, especially after 10pm.

Be considerate of nearby businesses.

Remember vessels and passengers have priority, clear your lines and tackle when they approach and move aside.

Do not block access or leave tackle on commuter seating and be respectful to passengers.

Always dispose of all rubbish, bait and unwanted tackle responsibly even if it is not yours.

Always clean up any fishing mess like scales, blood, ink or bait with a bucket of water before you leave.

Follow recreational fishing rules.

Report suspicious fishing activity to the **Fishers Watch Phoneline** on **1800 043 536** and contact NSW Police to report any anti-social behaviour.

NSW DPI has produced an educational video providing more info and handy tips about safely and responsibly fishing the ferry wharf network.

Check it out on the DPI YouTube channel!

Help maintain your access to the Sydney ferry wharves network by always doing the right thing. **Encourage your fishing mates to behave responsibly**.

Key target species

Yellowtail Kingfish

PEAK SEASON: Year round.

TECHNIQUE: The Harbour has established a reputation for producing good numbers of quality kingies in the metre-plus size. The most productive techniques

for these "hoodlums" involve using live squid and yellowtail fished off the deep water piers and wharves in the lower Harbour.

Smaller kingfish can be targeted with soft plastics cast from the same locations; fresh squid strips and pilchards also account for plenty of "rat" kings when they are about.

TACKLE: Spinning reels in the 8000-20000 size loaded with 50-80lb braid matched to a popping style rod teamed with 60-120lb fluorocarbon leader is the required tackle for chasing metre-plus kings when live baiting.

For casting poppers and soft plastics or floating some squid and pilchards around the deeper wharves and piers, a 4-8kg 2.1-2.7m spin stick and a 4000-6000 size spinning reel loaded with 15-30lb braid and 20-40lb fluorocarbon leader will be well suited to chasing the school sized fish.

HOT SPOTS: Walsh Bay/Clifton Gardens/McMahons Point/Balls Head Reserve/ Clarkes Point Reserve.

BAG & SIZE LIMITS: 5 per day 65cm and over.

Australian Salmon

PEAK SEASON: October – April. **TECHNIQUE:** Small soft plastics, metal lures, flies and hard-bodied lures cast around the deeper accessible spots from Balls Head down to the mouth of the Harbour all

work extremely well for the ever-popular sambo. Keep a close eye out for birds diving and wheeling near the surface - this is a prime indication that a school of hungry salmon is in the area.

Whole pilchards, whitebait and strips of fished unweighted or under a bobby cork in the same areas mentioned for casting lures.

TACKLE: Medium spinning outfits of 3-6kg involving a 2.1m rod and 4000-5000 size spin reel loaded with 15-30lb braid and 20-30lb fluorocarbon leader is perfect when chasing salmon.

HOT SPOTS: Walsh Bay/Clifton Gardens/McMahons Point/Balls Head Reserve/Clarkes Point.

BAG & SIZE LIMITS: 5 per day

PEAK SEASON: Year round.

TECHNIQUE: Bait fishing with fresh prawns, fish strips (i.e. mullet, striped tuna), marine worms; lure fishing with soft plastics,

vibes and small hard-bodied divers. **TACKLE:** 2-4kg spin outfits, 2kg braid or mono and 2-5kg leader. For bait fishing, use size 2-1/0 non-offset circle hooks unweighted or with a small running "00" ball sinker. Circle hooks are preferred for catch & release. The use of berley is effective when targeting bream on bait. Use 1-2 gram jig heads on size 1-2 hooks teamed with 3-8cm "wriggler" style tails when targeting bream on plastics. Use a slow "lift"

HOT SPOTS: Clarkes Point Reserve/Sawmillers Reserve/Bayview Park/Watsons Bay.

BAG & SIZE LIMITS: 10 per day over 25cm.

and drop" retrieve.

PEAK SEASON: Year round.

TECHNIQUE: Bait fishing with fresh squid and live bait such as yellowtail around the many deeper edges throughout the harbour close to a tide change is a proven way to target mulloway. Low light periods – dawn, dusk and at night – can be especially productive. Using soft plastic lures and vibes is extremely popular and proven to be as effective as using fresh bait, especially along the Parramatta River from Gladesville Bridge up to the Ryde Bridge.

TACKLE: When bait fishing, go for an outfit involving a rod around 2.7m rated at 4-8kg matched to a 3000-6000 sized spinning or baitrunner-style reel loaded with 15-30lb braid or mono. Use a running sinker rig to a swivel and around 1 metre of 30-50lb fluorocarbon leader with a 5/0 to 8/0 circle hook.

For lure fishing, a 2.1m graphite rod rated to 3-5kg with a 2500 – 4000 size reel loaded with 8-15lb braid and at least a rod length of fluorocarbon leader in 12–20lb size should cover most bases.

HOT SPOTS: Huntleys Point/Drummoyne/Ryde/Walsh Bay/Clarkes Point.

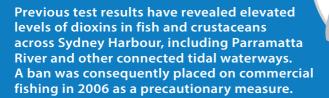

BAG & SIZE LIMITS: 1 per day 70cm and over. Boat limit of 2 per boat per day (if 2 or more fishers onboard). Charter boat limit of 3 per boat per day.

A number of other common species including garfish, flathead, mullet, tarwhine, flounder, fan-tail leatherjackets, luderick, drummer and silver trevally all can be found in good numbers depending on the time of year and location.

Sydney Harbour also offers a unique chance to target a lesser known species called the **surgeon fish or sawtail surgeon**. They can grow to 70cm and while not a hugely sought after species (they are mostly a by-catch for luderick anglers using green weed for bait), there are few fish that will pull harder.

Dioxins in Sydney Harbour

Recreational fishing in the Harbour has not been banned, but fishers are urged to follow dietary advice on the consumption of seafood from the Sydney Harbour, Parramatta River and other connected tidal waterways. Fishers can also continue to practice catch and release.

Based on advice from an expert panel, the Government is recommending that:

- No fish or crustaceans caught west of the Sydney Harbour Bridge should be eaten. You should release your catch.
- For fish caught east of the Sydney Harbour Bridge generally no more than 150 grams per month should be consumed.

Recommended maximum intake based on eating a single species caught east of the Sydney Harbour Bridge

Species	No. of 150 gram serves per month	Amounts per month	Species	No. of 150 gram serves per month	Amounts per month
Fanbellied leatherjacket	24	3600 g	Crab	5	750 g
Dusky flathead	12	1800 g	Silver trevally	5	750 g
Flounder	12	1800 g	Prawns	4	600 g
Kingfish	12	1800 g	Squid	4	600 g
Luderick	12	1800 g	Bream	1	150 g
Trumpeter whiting	12	1800 g	Silver biddie	1	150 g
Sand whiting	8	1200 g	Tailor	1	150 g
Yellowtail	8	1200 g	Sea mullet	1 every 3 months	50 g

Testing of popular species has allowed for more accurate dietary advice. https://www.dpi.nsw.gov.au/fishing/recreational/fishing-skills/fishing-in-sydney-harbour
