

DO YOU WORK WITH PLANTS OR ANIMALS?

Australia is free of many of the pests, weeds and diseases found in other parts of the world. We need your help to keep it that way – here's how you can help keep Australia clean, green and healthy when you're working on a farm.

COME CLEAN, GO CLEAN

Don't carry unwanted pests, diseases of weeds on or off the property. Scrub your boots before entering or leaving crop or production areas. Make sure all tools and equipment are clean before and after work. Wash your vehicle before entering and leaving – remember some pests and weeds may be unwanted hitchhikers!

KNOW THE RISKS

If you are working around plants or animals, even temporarily, you should know the main risks. Your boss should help you understand through training and information.

Ask your boss if there are special plans, rules or restrictions. If you don't understand something, ask your boss for more information.

REPORT IT

Keep a lookout for pests or weeds or anything that might be a risk. If you see something that might be a risk, report it to your boss. A false alarm is better than a real emergency.
