USERS' GUIDE

This Vegetable SOILpak manual is designed to provide soil information relevant to irrigated vegetable production in New South Wales. The manual aims to provide decision support for landholders and advisers, helping to maintain or improve productivity over both the short and long term.

Is this your first use of the SOILpak manual?

Is there a specific soil problem you are interested in?
See Chapter A4 *Trouble-shooting guide*
See Chapter B1 *Common problems and strategies*

Do you need to know the important soil considerations
influencing productivity and management of farming systems?
See Parts B and D

Do you want to monitor or judge the condition of your soil?
See Parts D and E

Do you need general soil information?
See Chapter A3 *Features of soil*
