

# NSW DPI Dairy Unit

Department of  
Primary Industries

The NSW DPI Dairy Unit delivers industry research, development and adoption programs that support a profitable, resilient and sustainable NSW dairy industry.

The primary focus is on farm business management, innovation, technology and industry sustainability as well as support related to policy development, risk management and emergency response.

We believe in building strong, collaborative, long-term partnerships with farmers, researchers, the private sector and industry organisations to set the foundations of a successful, productive and profitable future for the NSW dairy industry.

The NSW Department of Primary Industries is Australia's largest supplier of research and development services to primary industries. NSW DPI works to increase the value of primary industries and drive economic growth across NSW.

DPI Agriculture is responsible for increasing the productivity and resilience of the agricultural sector. It does this through agricultural productivity research across livestock, plants and natural resource management areas, as well as providing education and training through Tocal College.

The NSW DPI Dairy Unit is part of the Intensive Livestock Unit within the Livestock Systems branch of DPI Agriculture.
