NSW DPI Fisheries

Follow these basic safety tips at all times

- Care for your own safety and never take undue risks when fishing: even when fighting fish or trying to retrieve tackle. Never enter the water to retrieve lost tackle or snagged fish. If the location looks dangerous, don't fish there.
- Wear a lifejacket. When boat fishing or when fishing in hazardous locations such as rock platforms or those located near areas of fast moving water always wear a lifejacket. It may also be appropriate to wear non-slip shoes.
- If someone falls into the water: do not jump in after them instead look for an angel ring, life buoy or something that floats and throw it to the person in the water. Alert emergency services by dialling 000 on your phone.
- Observe first, fish later: always check weather and water conditions before you start fishing.
- Inform others of your fishing plans: always let friends or family know where you are going and when you will be back.

Rock fishing safety

Rock fishing can be particularly dangerous due to the unpredictable nature of the ocean.

Follow these safety tips at all times when rock fishing or when fishing in hazardous areas:

- **Wear a life jacket.** Also bring something buoyant that can be easily thrown and held onto, to help you stay afloat.
- **Never fish by yourself:** fish in a group of at least three people and within sight of each other. If someone is washed in, one person can stay and help while the other alerts emergency services (dial 000). Mobile phone users can also dial 112 to access emergency services.
- **Inform others of your plans:** always let friends or family know where you are going and when you will be back.
- **Wear light clothing:** light clothing such as shorts and a spray jacket will let you swim easily if you are washed in. Jumpers may be heavy and difficult to take off.

- **Wear appropriate footwear:** cleats, sandals and sandshoes with non-slip soles suit different surfaces. Use the appropriate shoes for the conditions.
- **Fish only in places you know are safe and never fish in exposed areas during rough or large seas.** Make sure you are aware of local weather, swell and tidal conditions before going fishing. Be aware that conditions may change dramatically in a short period of time.
- **Observe first, fish later:** spend some time (at least 30 minutes) watching your intended spot before fishing to get an idea of the conditions over a full swell/ wave cycle. Wave conditions can get worse as the tide changes - you should know whether the tides are high or low and coming in or going out.
- **Plan an escape route in case you are washed in.** Stay calm, if you are washed in, swim away from the rocks and look for a safe place to come ashore or stay afloat and wait for help to arrive.
- **Stay alert.** Never turn your back on the sea, if the waves, weather or swell threaten your fishing spot then leave immediately.
- **Ask for advice from locals who know the area.** They can advise you of good, safe fishing locations.
- **Do not jump in if someone is washed into the water.** Use your rope or something that floats to rescue the person. If there is an angel ring nearby know how to use it. Dial 000 to alert emergency services to get help.
